

Polish Communications Company 5G Base Station

Overview

How many 5G base stations are there in Poland?

This means that more than 2200 base stations guarantee access to the 5G network for more than 15 million people in nearly 500 towns and places. As a result, the biggest and the fastest 5G network in Poland covers an area inhabited by more than 40% of the country's population.

Are mobile operators building 5G networks in Poland?

Mobile operators in Poland have been testing 5G technology and have begun preparations for building 5G networks. While early pilot projects were mostly based on Huawei technology, in later initiatives the operators have focused on Ericsson and Nokia.

How many people in Poland are covered by 5G?

Already more than 15 million people in Poland, in nearly 500 towns and places, live within the coverage footprint of Plus's 5G network. Since the end of June the coverage of our 5G network has been extended to include new areas inhabited by more than 2 million people.

Will Polish 5G be available to all operators?

In October 2019, the four leading mobile operators (Cyfrowy Polsat, Orange, Play and T-Mobile), the state-owned telecom operator Exatel and the Polish Development Fund (PFR) signed a memorandum of understanding to establish the Polish 5G which will manage the 700 MHz network, making it available to all operators.

Will a 700 MHz network be incorporated into Polish 5G?

Integration of the 700 MHz infrastructure would considerably lower the cost and allow the operators to focus on the 3.4-3.8 GHz and 26 GHz networks. The business plan for Polish 5G is yet to be developed but the goal is to launch a country-wide wholesale 700 MHz network in 2023.

Will Poland launch a 5G network in 2023?

The business plan for Polish 5G is yet to be developed but the goal is to launch a country-wide wholesale 700 MHz network in 2023. This is pioneering solution, yet to be consulted with the European Commission. Sales opportunities are open in Poland's 5G network development.
