

Polish communication base station energy storage system construction project

Overview

What energy storage projects are happening in Poland?

Another notable energy storage project in Poland is gigafactory company Northvolt's energy storage system (ESS) assembly and production facility, which recently bagged a share of €1.8 billion in EU funding. State-owned power company PGE Group has obtained regulatory approval to build a 200MW/820MWh battery energy storage system (BESS) in Poland.

How many projects in Poland have received a grid connection offer?

As of October 2023, around 9GW of projects have received grid connection offers from Poland's Transmission System Operator PSE. Only 6 projects with a total capacity of around 1.5GW, have agreed on the proposed terms with the TSO, with an expected connection date post-2027.

What is a commercial hybrid energy storage project?

The project, called CHEST (Commercial Hybrid Energy Storage), will target a capacity of no less than 200MW and a power output of 820MWh, making it one of the largest in Europe, PGE Group said. It will use lithium-ion batteries.
