

# Polish companies using flow batteries

## Overview

---

Why is Poland a key player in the battery industry?

Poland has become a key player in the global battery industry, becoming the country with highest battery production in Europe. As the demand for lithium-ion batteries is getting higher over time, Poland has positioned itself as a major production hub for sustainable energy solutions in the world.

Is Poland a good place to start a battery industry?

The pool of qualified personnel that can shape the competence in this regard is quite significant. In Poland alone, there is ample workforce which can be unlocked for the battery segment within the automotive industry.

Why is Poland becoming a magnet for battery factories?

Poland is rapidly becoming a magnet for investments in battery factories thanks to its skilled workforce and government programmes promoting electromobility. Which companies are driving this transformation and what is their impact on the industry?

.

Does Europe run on Polish lithium-ion batteries?

We are pleased to present our report titled “Europe Runs on Polish Lithium-Ion Batteries: The Potential of the Battery Sector in Poland and the CEE Region”. This report was developed with substantial support from market leaders and stakeholders in Poland and Slovakia.

What are the current commercial flow battery chemistries?

Current commercial flow batteries are based on vanadium- and zinc-based flow battery chemistries. Typical flow battery chemistries include all vanadium, iron-chromium, zinc-bromine, zinc-cerium, and zinc-ion.

What role does Poland play in battery supply chain?

Poland plays a leading role in the battery sector supply chain. Lithium-ion batteries already account for more than 2.4% of all Polish exports. The value of exports in the battery sector increased 38-fold over the last six years from around PLN 1 billion (EUR 0.21 billion) in 2017 to over PLN 38 billion (EUR 8.24 billion) in 2022.
