

Power station shuts down

Overview

Why did three power plants shut down in 2020?

The three plants were originally set to shut down in 2020 under state regulations aimed at power plants that suck up ocean water to cool down their equipment. Many similar power plants have already shut down to comply with those rules.

What happens if Ameren's coal plant shuts down?

Once the plant shuts down, the company will start disconnecting the plant from power, move equipment out to Ameren's other coal plants and ready it for demolition, said Tim Lafser, Ameren's vice president of power operations and engineering.

Will Ameren power plant shut down?

JEFFERSON COUNTY, Mo. — An Ameren power plant with a long history of federal Clean Air Act violations will shut down on Tuesday. The Rush Island Energy Center was the nation's sixth-largest emitter of sulfur dioxide (SO₂) when it was fully operational, according to the Sierra Club.

Will PJM shutdown save wholesale electricity customers \$93 million?

PJM says this shutdown will save wholesale electricity customers around \$93 million. As of Wednesday, Dec. 18, Delmarva Power completed its final stage of transmission upgrades that would allow the power plant unit to shut down.

Why did EDF shut down Paluel?

In their statement, EDF confirmed that they shut down one of the four reactors at Paluel at 9 p.m. local time on Wednesday, September 3 after jellyfish entered the pumping station. This means that at one point, only two of Paluel's four reactors were at full capacity, crippling the plant's normal output of 5.528 GW.

Why did EDF shut down production unit 4?

Like France, both of these plants draw seawater directly from the coast. EDF said: "Production unit No. 4 was safely shut down by the operator following the arrival of jellyfish at the filters (pre-screens and filter drums) of the pumping station, located in the non-nuclear part of the facilities.
