

Power supply for Chilean base stations

Overview

What plug types and power outlets are used in Chile?

The Standard Plug Types and Power Outlets used in Chile are: Adapter vs. Converter An Adapter (aka plug adapter or power adapter) is used to adapt the physical shape of the plug so that it can be plugged into a different type of power outlet or socket. It doesn't transform the voltage of the power source.

Does Chile have a power outlet?

No, most power outlets and plug types in Argentina are type-I (the same as in Australia, New Zealand, and China). However, there are some places in Argentina with type-C power outlets — the plug type used in Chile — or outlets that accommodate both. Do I need a voltage converter in Chile?

Chile has a 220-240 voltage supply.

Do I need a power adapter in Chile?

For travel in Chile, you need a type-C adapter. It should have a type-C plug to fit into the Chilean power outlet and have a port that accepts the plug type from your country (some are designed to accept any plug type). Note: type-C refers to the plug type common in Europe and Chile, not USB-C. Does my iPhone need a voltage converter in Chile?

.

What type of adapter do I need for Chile?

What kind of adapter do I need for Chile?

For travel in Chile, you need a type-C adapter. It should have a type-C plug to fit into the Chilean power outlet and have a port that accepts the plug type from your country (some are designed to accept any plug type). Note: type-C refers to the plug type common in Europe and Chile, not USB-C.

What voltage does Chile use?

Chile uses outlet types C, L at a voltage of 220V and a frequency of 50 Hz.
Plug Compatibility: Type C, L Voltage: 220V Frequency: 50 Hz Can North Americans use Electronics in Chile without an Adapter?

No! North Americans will need an adapter for the outlets and a transformer for the voltage when traveling to Chile.

Does Chile have a 240 volt power supply?

Chile has a 220-240 voltage supply. You will only need a converter if you plan to use an electronic device that is not dual-voltage and not compatible with 220-240V. For example, a non-dual-voltage hair dryer made in the U.S. would be compatible with a 120-voltage supply and would not work in Chile. (It would overheat).

Power supply for Chilean base stations

CB Radio Base Station Equipment Recommendations and Advice

The basic components for a Base Station CB System include a CB radio, power supply (if you are using a mobile CB radio instead of a base station CB radio), coax, and an antenna. The article ...
