Price of imported photovoltaic panels in Serbia

Overview

The cost of installing solar panels in Serbia varies depending on several factors, including system size and roof type, but it generally ranges from €1,000 to €1,200 per installed kilowatt. Therefore, a six-kilowatt solar system would require a minimum investment of €6,000.Why is solar energy becoming an attractive prospect in Serbia?

There are several reasons why solar energy is becoming an attractive prospect in Serbia, and we'll be looking at some of them. Solar solutions or projects appeal massively in Serbia because they're durable. According to research, the average lifespan of a solar panel is 20-25 years, while that of the battery and inverter is a decade.

How much does it cost to install a photovoltaic system?

An individual prosumer installing a photovoltaic system needs to invest several thousand euros, or an average of EUR 700 per kW of installed capacity. The investment pays off in 6 to 8 years, and the cost is EUR 500 lower if no batteries are installed.

How much does it cost to install a rooftop solar system?

These projects are being developed at industrial facilities whose rooftops span 3,000 square meters or more. The cost of installing a rooftop solar system for businesses is about EUR 650 per 1 kW of installed capacity for power stations of more than 30 kW and EUR 600 per 1 kW for those whose capacity exceeds 100 kW.

How much electricity does Elektroprivreda Srbije produce a year?

The main utility company in the country, Elektroprivreda Srbije, has a total capacity of 7,662 megawatts that produces roughly 39 terawatts of electricity annually. From this figure, a significant portion (4,390 MW) comes from its lignite thermal power plants, 336 MW from gas and liquid fuel power plants, and 2,936 MW from hydropower stations.
