

Price of liquid-cooled energy storage containers in Togo

Overview

What is a populated 20ft NWI liquid-cooling energy storage container?

*Specification of Battery Rack The populated 20ft NWI liquid-cooling energy storage container is an integrated high energy density system, which consists of battery rack system (280Ah LFP cell), BMS (battery management system), FSS (fire suppression system), thermal management system and auxiliary distribution system.

What is liquid cooled battery storage system?

Liquid-cooled battery storage system based on prismatic LFP ESS cells 314 Ah with the highest cyclic lifetime Improved safety characteristics and specially optimised for the highest requirements on safety, reliability and performance. Suitable for industrial, utility, and grid serving applications, etc.

What is ENERC liquid cooled energy storage battery containerized energy storage system?

EnerC liquid-cooled energy storage battery containerized energy storage system is an integrated high energy density system, which is in consisting of battery rack system, battery management system (BMS), fire suppression system (FSS), thermal management system (TMS) and auxiliary distribution system.

How many battery cells are in a ENERC liquid cooled container?

The battery system is composed of 10 battery racks in parallel. Each battery rack contains 8 battery modules by series connection, each battery module is composed of 52 battery cells in series connection also, so each rack contains 416 battery cells. Totally, EnerC liquid-cooled container's configuration is 10P416S.

What is ENERC liquid cooled container?

Totally, EnerC liquid-cooled container's configuration is 10P416S. Total 52

pieces lithium iron cells (280Ah/3.2V) in series connection are used for every battery module. For safety protection, an internal high speed DC fuse is included, and removable MSD switch can cut off the high voltage connection during transportation process.

Price of liquid-cooled energy storage containers in Togo
