

Recommendation of integrated solar inverter

Overview

Which solar inverter should I buy in 2025?

Every solar system needs some kind of inverter to convert sunlight into usable electricity. CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025.

How do I choose the best solar inverter?

Choosing the best solar inverter comes down to efficiency, voltage performance, warranties, and price. We looked at all these factors in dozens of models featured on the EnergySage Marketplace to determine the best inverters of 2025. Five brands stood out: SolarEdge, Tigo, Enphase, Hoymiles, and Schneider Electric.

Can a solar inverter be integrated with a battery storage system?

Yes, solar inverters can be integrated with battery storage systems. This combination allows you to store excess solar energy for use throughout the night or during utility power outages.

Can I add solar panels later with a microinverter?

While it's easier to add solar panels to your system later with microinverters, choosing the right string inverter before your installation is critical, as central inverter systems are typically built-to-suit without the capacity for expanded solar generation. Use our online tool to find the right sizes for your solar energy system components.

Do you need a solar inverter?

Solar inverters are a necessary but often forgotten part of a home solar panel system since they convert sunlight into usable electricity for your home appliances. Without a solar inverter, you wouldn't be able to use those solar panels to power your home.

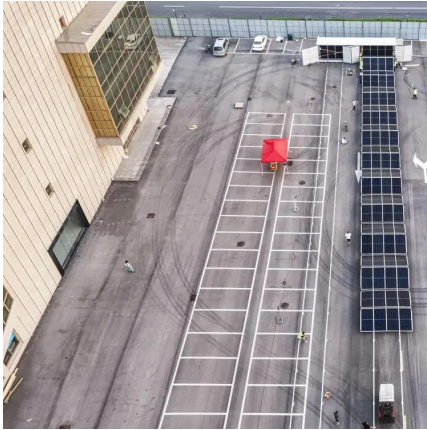

What size solar inverter do I Need?

The inverter must align with your solar panel array's total output and the grid requirements in your region. For example, a typical residential system may require a 3-10kW inverter, while large commercial systems often demand 30kW or more.
