

Request for Procurement of Energy Storage Project Equipment

Overview

The guide provides an outline of request for proposal sections, examples of information to include in order to communicate project requirements clearly, and references to other ESIC tools and templates that can support the procurement process. What is a request for Proposal (RFP)?

A Request for Proposal (RFP) is a critical document when procuring a Battery Energy Storage System (BESS). It defines technical specifications, project requirements, and supplier expectations, ensuring you receive accurate and competitive proposals from vendors.

What is a battery energy storage system checklist?

Checklist provides federal agencies with a standard set of tasks, questions, and reference points to assist in the early stages of battery energy storage systems (BESS) project development.

Can a project be eligible for a NYSERDA bulk energy storage program?

5 Participation in the utility procurements precludes a Project's eligibility for the NYSERDA Bulk Energy Storage Program and NYSERDA's Request for Proposals to procure Index Storage redits (ISCRFP25-1) New York State Electric & Gas Corporation Rochester Gas and Electric Corporation 2025 Bulk Power Energy Storage Request for Proposals.

Can energy storage resources be financed on a nonrecourse basis?

Key Finance-ability Provisions: Energy storage resources may also be financed on a nonrecourse basis and, like any other project financed in such manner, will need to address issues upon which nonrecourse lenders will focus, including assignment, events of default, performance requirements, key dates, and collateral.

What are the requirements for a storage project?

Storage Projects must meet all Building, Fire Department, and any other

government agency design and safety requirements as required and applicable. See Appendix C4 for additional details. 19NYISO and local utility distribution studies as required per interconnection location and associated requirements.

How do energy storage contracts work?

For standalone energy storage contracts, these are typically structured with a fixed monthly capacity payment plus some variable cost per megawatt hour (MWh) of throughput. For a combined renewables-plus-storage project, it may be structured with an energy-only price in lieu of a fixed monthly capacity payment.
