Are solar panels a good option for a portable power station?

The panels are durably made and highly portable, and while they're not exactly lightweight, they're not overly cumbersome. They're a perfect option for charging up a portable power station in a van conversion or RV and fitting into any cargo space with ease.

Is a folding panel durable?

While it is pretty heavy for a folding panel, a sturdy handle makes it easy to grip, and just carrying the thing you can feel that it's a hardy product. And it certainly is durable. I tend to be pretty hard on my gear, and after many drops and bumps, mine is still going strong.
