

Serbia s backup energy storage battery

Overview

When will solar & battery facilities be delivered in Serbia?

The solar and battery facilities shall be delivered by June 1, 2028. Government representatives were quoted earlier this year saying that construction could start already in 2024. According to the Association of Renewable Energy Sources of Serbia, the country has installed around 95 MW of solar.

How many solar panels are installed in Serbia?

According to the Association of Renewable Energy Sources of Serbia, the country has installed around 95 MW of solar. However, that figure is not exact, as there is no official registry for solar installed for self-consumption at this stage.

Does Serbia have a solar project?

Last April, Serbia switched on its largest utility-scale solar project, the 9.9 MW DeLasol PV project in Lapovo, central Serbia. Presently, the country is looking to introduce new renewables-related regulation. Under the proposed changes to the Law on Energy, Serbia is looking to abolish net billing and net metering by the end of 2026.
