

Share of solar panel exports

Overview

An interactive chart showing monthly solar PV exports from China, the world's largest exporter, by selected country or region of destination. China's exports account for 80% of global solar PV exports. Full details available in Ember's China Solar Export Methodology. Which country exports the most solar PV?

An interactive chart showing monthly solar PV exports from China, the world's largest exporter, by selected country or region of destination. China's exports account for 80% of global solar PV exports. Full details available in Ember's China Solar Export Methodology.

Where do solar PV exports come from?

The latest solar PV export data from the world's largest exporter, China, by country or region of destination. Data updated on a monthly basis. An interactive chart showing monthly solar PV exports from China, the world's largest exporter, by selected country or region of destination. China's exports account for 80% of global solar PV exports.

What are China's solar PV exports?

In 2021, the value of China's solar PV exports was over USD 30 billion, almost 7% of China's trade surplus over the last five years. In addition, Chinese investments in Malaysia and Viet Nam also made these countries major exporters of PV products, accounting for around 10% and 5% respectively of their trade surpluses since 2017.

Which countries export solar panels to the United States?

Solar panel exports from Vietnam, Malaysia, Thailand and Cambodia to the U.S. fell by 33% on an annual basis in the nine months since the first round of tariffs in June. In the same period, exports from regional neighbours Indonesia and Laos grew around eight-fold, the trade data showed.

Who exports solar modules to the US?

It is among the largest exporters of solar modules to the US. Several of their firms have plans to expand. For example, the local Sunova Solar Technology in Vietnam exports its solar modules to the US market. It had also announced the opening a solar module manufacturing center in the US in 2024.

What is China's solar export method?

Full details available in Ember's China Solar Export Methodology. The IEA has stated that China's solar photovoltaic exports account for 80% of the global market. While there is a wide variety of products that make up the solar supply chain, panels, cells and wafers make up the majority of exports by trade value, and can be expressed in GW terms.

Share of solar panel exports

China's solar PV module exports hit 236 GW in 2024, with growth ...

China's solar PV module exports hit 236 GW in 2024, with growth in all regions except Europe. China exported 16.63 GW of modules in December 2024, up 9% MoM from ...
