

# **Sierra Leone Large Outdoor Power Supply**

## Overview

---

How much electricity does Sierra Leone have?

The power supply in the country can at best be described as sporadic. Most of the electricity supply (90%) is restricted to the main four cities of Freetown, Kenema, Bo and Makeni. Uninhibited demand for electricity in Sierra Leone is estimated at 500MW; more than five times the current total national generation capacity of 100 MW.

Where does Sierra Leone's power come from?

Sierra Leone's power generation is primarily derived from two sources - the oil fired Kingtom Power Station and the Bumbuna hydro-electric power plant located on the Seli river in the Tonkolili district. The Kingtom Station is aging and is in a poor condition being unable to ensure the delivery of a reliable and stable supply.

How much money is needed to boost economic growth in Sierra Leone?

Addressing these acute power problems is essential to boosting economic growth in Sierra Leone. Commentators estimate that around \$3 billion of new investment is required in the sector over the coming years in both generation and the network to distribute the power to homes and businesses.
