

# **Single-phase off-grid energy storage inverter**

## Overview

---

What is a SolarEdge Home Hub single phase inverter?

The SolarEdge Home Hub Single Phase Inverter (SExxxxH-RWBxxxx), is used for various applications that enable energy independence for system owners by utilizing a battery to store and supply power as needed. The Inverter, when installed in combination with the SolarEdge Home Backup Interface, provides backup power during a utility grid failure.

What is a two-channel single-phase string inverter?

This reference design is intended to show an implementation of a two-channel single-phase string inverter with fully bidirectional power flow to combine PV input functionality with BESS supporting a wide range of battery voltages. This system consists of two boards that are split by different functionality.

What is a Home Hub single phase inverter?

Home Hub single phase inverter with partial backup In this configuration, the inverter with the BUI provides homeowners with backup power for partial home loads - loads that are within the island network - in the event of a grid outage.

What is a SolarEdge inverter?

In this configuration, a SolarEdge Inverter, BUI, and batteries are added to an existing Third-party PV/Battery Storage system. The SolarEdge inverter connected to the BUI provides homeowners with backup power for full home loads in the event of grid interruption.

What is an Hyi solar inverter?

The AN-HYI series parallel hybrid solar inverter is a high-performance, IP65-rated 6kW single-phase solar inverter designed for reliable solar energy storage and intelligent power management.

What is an IP65 hybrid inverter?

Combining weatherproof durability with advanced energy control, this IP65 on/off grid hybrid inverter ensures efficient operation in diverse environments while maximizing solar self-consumption and backup power capabilities.

## Single-phase off-grid energy storage inverter
