

# Solar Cell Control System

## Overview

---

A Photovoltaic controller is one of the core components in a photovoltaic power generation system. Its primary function is to manage and control the electrical energy generated by solar panels. Let's delve into the working principle of a Photovoltaic controller.

## Solar Cell Control System

---

### Design and Research of the Control and Management System of ...

In this paper, a block diagram of the photovoltaic cell power generation system (as shown in Fig. 1) is designed to realize the integrated power supply management function of the ...
