

Solar Energy in Armenia

Overview

Solar energy is widely available in Armenia due to its geographical position and is considered a developing industry. In 2022 less than 2% of Armenia's electricity was generated by solar power. The use of solar energy in Armenia is gradually increasing. In 2019, the European Union announced plans to.

According to the , Armenia has an average of about 1720 .

In Armenia, , or water-heaters, are produced in standard sizes (1.38-4.12 square meters). Solar water-heaters can be used for space heating, solar.

• • • .

As of April 2019 ten 1 MW strong solar stations are installed. Solar and wind stations account for less than 1% of total installed electricity generation capacities. In April 2019 it was.
