

Solar Photovoltaic Processing in Benin

Overview

Axian Energy and Sika Capital have started work on four solar power plants, which will be the country's first utility-scale PV IPPs. Progress is also being made on the third phase of a state-owned solar PV plant. Who is building Benin's biggest solar power plant?

Eiffage Énergie Systèmes is building Benin's biggest . Beninese Electrical Energy Company SBEE has appointed Eiffage Énergie Systèmes' teams (and teams from our subsidiary RMT in particular) to build a photovoltaic solar power plant and a high-voltage bay enabling the plant to be connected up to the national power grid.

Will defissol help Benin reduce its energy bill?

Onigbolo power plant construction project, known as Defissol, is co-funded by the European Union (EU), French Development Agency (AFD) and the SBEE. It should allow Benin to reduce its energy bill, while enhancing the value of renewable energies.

How will illoulofin solar power plant work?

The electricity generated will be injected into the SBEE grid via a 161-kV HV link Illoulofin solar power plant will enable 35 GWh of electricity per year to be generated, covering the energy consumption of 180,000 people.
