

# Solar panel prices in Cuba

## Overview

---

How many solar panels are there in Cuba?

This greatly underdeveloped energy source is slowly making its way across the island: there are currently more than 6,000 photovoltaic panels and 1,500 solar heaters in use. The installed solar energy generating capacity in Cuba is around 3 megawatts, or 0.07 % of the total installed capacity.

Is Cuba a good place to build a solar project?

High-quality construction materials for your projects Cuba is in a geographically privileged position for solar energy utilization, with over 330 sunny days per year and an average solar irradiation of 5.5 kWh/m<sup>2</sup>/day. This abundant solar radiation makes the island an ideal location for photovoltaic system implementation.

Is Cuba wasting solar energy?

The opportunity now for individuals to import their own photovoltaic systems to Cuba, may change this situation. With just 20,000 solar water heaters and a million kWh every day of energy installed in its photovoltaic parks, Cuba is basically wasting the vast majority of the solar energy it has available. Read more from Cuba here on Havana Times.

How much energy does Cuba use per month?

By the end of 2020, the average consumption of private clients in Cuba was 185 kilowatts/hour (kWh) per month: just over 2200 kWh per year. Practically the amount of energy that reaches any geographic location in Cuba in the form of solar irradiance in a year (around 1825 kWh per cubic meter).

How much electricity does a Cuban House use?

With today's photovoltaic technologies, any Cuban house can in theory satisfy its own electricity needs, as well as that of neighboring residences. By the end of 2020, the average consumption of private clients in Cuba was 185

kilowatts/hour (kWh) per month: just over 2200 kWh per year.

What kind of generators are available in Cuba?

Silent Excalibur diesel and gasoline generators from 2KVA to 20KVA with electric start, low consumption and noise level below 60dB. High-quality construction materials for your projects Cuba is in a geographically privileged position for solar energy utilization, with over 330 sunny days per year and an average solar irradiation of 5.5 kWh/m<sup>2</sup>/day.
