Overview

How much do solar panels cost on average?

As of 2025, the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below). How much do solar panels typically cost?

The average cost to install solar panels in the United States is about \$12,000 after federal tax incentives. On the low end, you can install a smaller system for around \$5,000, while a high-priced Tier 1 solar panel system can cost \$40,000 or more. There are additional costs that go into an installation project beyond the price of panels.

Are solar panels worth the investment?

For most people, solar panels are worth the investment, but they may not be right for you in some rare circumstances. However, even renters may have solar options if their property owners or managers are open to it – and if not, they might be able to sign up for community solar projects near them.

How much does it cost to produce solar energy?

Solar panels cost \$1.77 to \$2.20 per watt and a 6 kW solar panel installation for the average home costs from \$10,626 to \$13,230 after the 30% federal solar tax credit. Solar energy costs \$0.08 to \$0.10 per kWh to produce on average, depending on your location.

What is the average cost of solar energy per kWh?

Solar systems have ratings based on the electricity produced annually in average conditions. Residential solar energy costs \$0.08 to \$0.10 per kWh on average, and commercial or utility-scale solar power costs \$0.06 to \$0.08 per kilowatt-hour.
