# Solar panels cost $30 per square meter

Overview

How much do solar panels cost?

For an average 6.5 kW solar system, you'll spend anywhere from $16,600 to $20,500 before accounting for tax credits or rebates. You can break down the bulk of the cost of your solar panel system by looking at the panels and equipment, labor and permits. Solar panels cost between $0.30 and $0.90 per watt without labor and other fees.

How much did solar panels cost in 2024?

Analyzing millions of transaction-level data points from homeowners on EnergySage, it highlighted a clear milestone for solar panels: The average price had dropped 30% year-over-year in 2024. According to the report, the median quoted price of solar decreased for the third year in a row, hitting its lowest in recorded data at $2.50 per watt.

How much does solar cost per watt?

According to an EnergySage report, the median quoted price of solar decreased for the third year in a row, hitting its lowest in recorded data at $2.50 per watt.

How much does a 6 kW solar system cost?

You'll pay $4,200 to $6,000 to set up a 6 kW system. Concentrated photovoltaic (CPV) panels are $0.80 to $1.10 per watt. While not as well-known as other types of panels, CPV panels are highly efficient and may grow in popularity. A 6 kW solar system would cost $4,800 to $6,600.

How much do polycrystalline solar panels cost?

Polycrystalline solar panels have an average cost ranging from $0.90 to $1.50 per watt. Both polycrystalline and monocrystalline solar panels belong to the category of photovoltaic (PV) solar panels, converting sunlight into electricity.

How much does a CPV solar system cost?

Concentrated photovoltaic (CPV) panels are $0.80 to $1.10 per watt. While not as well-known as other types of panels, CPV panels are highly efficient and may grow in popularity. A 6 kW solar system would cost $4,800 to $6,600. A single solar cell costs about $0.30 and most panels use 60 or 72 cells. The more cells in a panel, the higher the cost.
