

Solar panels from various companies have similar prices

Overview

What makes solarreviews the best place to buy solar panels?

Solar companies know that they have to be competitive when bidding on referrals from SolarReviews. This price competition and our rigorous process to select solar companies to partner with makes SolarReviews the best place to shop for solar panels.

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

Why should you choose the best solar panel brands?

With the growing demand for renewable energy, solar panel brands have become an essential investment for homeowners, businesses, and industries. Choosing the best solar panel brands ensures high efficiency, durability, and long-term savings. With multiple brands available in the market, making the right choice can be challenging.

Who makes the best solar panels?

With manufacturing facilities in the US, Qcells is another great solar panel company with a wide range of solutions for homeowners today. The Q.Trion Series is the brand's highest-efficiency residential product to date, with home solar efficiencies of up to 22% and panels up to 430W in capacity.

Are solar panels cheaper than a professional installation company?

Yes and no. Solar panel kits are much more affordable than having a professional installation company install a solar array for you. However, affordability upfront isn't the only factor. Trying to take your home off-grid is a

huge task that most people, frankly, aren't up to.

Are affordable solar panels better than expensive?

This usually means that affordable panels are less efficient than expensive ones. The tradeoff for you is that less efficient panels don't convert sunlight to usable energy as readily as more efficient panels, which means your system will produce less electricity and save you less money in the long run.
