

# **Solar system home costs in Serbia**

## Overview

---

The cost of installing solar panels in Serbia varies depending on several factors, including system size and roof type, but it generally ranges from €1,000 to €1,200 per installed kilowatt. Therefore, a six-kilowatt solar system would require a minimum investment of €6,000. Is solar energy a good investment in Serbia?

The independent Belgrade-based Environment Improvement Center estimates that the potential of solar energy in Serbia is 30% higher than in Central Europe. In Serbia, however, says energy efficiency expert Slobodan Jerotic, the question is really how many households can afford to invest €5,000–6,000 in solar power systems.

Who are the 'prosumers' of solar energy in Serbia?

Her four-person household is one of the first "prosumers" of solar photovoltaic (PV) energy in the country. Prosumers are households that produce and consume electricity from their own solar plants, even if these plants are made up of just a few panels. In Serbia, home-generated energy in excess of a household's needs is sent to the grid.

How much does electricity cost in Serbia?

Industry-specific and extensively researched technical data (partially from exclusive partnerships). A paid subscription is required for full access. In September 2024, the average wholesale electricity price in Serbia decreased to 107 euros per megawatt-hour from 127 euros per megawatt-hour the previous month.

How much does it cost to install a rooftop solar system?

These projects are being developed at industrial facilities whose rooftops span 3,000 square meters or more. The cost of installing a rooftop solar system for businesses is about EUR 650 per 1 kW of installed capacity for power stations of more than 30 kW and EUR 600 per 1 kW for those whose capacity exceeds 100 kW.
