

Solar system home prices in Vietnam

Overview

In 2025, the cost of solar energy installation in Vietnam varies widely by capacity and installation conditions, from homes to large enterprises. The installation cost of home solar systems in Vietnam depends on the system capacity, ranging from 35 to 150 million VND based on kWh. How much does a solar project cost in Vietnam?

Vietnam's Ministry of Industry and Trade (MIOT) recently introduced new ceiling prices for solar and wind projects that sell electricity to Electricity of Vietnam (EVN). The ceiling price for ground-mounted solar has been slashed from \$0.0709/kWh to \$0.0502/kWh, threatening the financial viability of large-scale solar projects.

How much solar power does Vietnam have?

This included 16 billion kWh from solar power and 7.3 billion kWh from wind energy, according to data from Vietnam Electricity. Solar power, in particular, has seen significant expansion due to the implementation of feed-in tariffs and the increasing adoption of rooftop solar systems.

How to choose a solar energy company in Vietnam?

As solar is becoming cheaper and more popular, choosing among the many solar energy companies in Vietnam is getting harder, especially so as each installer may offer you different packages, services and energy solutions. Finding the right solar installer for your roof is important in ensuring a hassle-free installation that you are satisfied with.

Does Vietnam have a solar power industry?

Vietnam's solar power industry has grown rapidly since 2017, driven by generous feed-in tariffs and strong government support. The country now has one of the highest installed solar capacities in Southeast Asia, contributing significantly to its renewable energy goals. 2. What challenges is Vietnam's solar power sector facing?

How much does a ground-mounted solar project cost in Vietnam?

The ceiling price for ground-mounted solar has been slashed from \$0.0709/kWh to \$0.0502/kWh, threatening the financial viability of large-scale solar projects. Vietnam's Ministry of Industry and Trade (MIOT) has set new price ceilings for the so-called "transitional" wind and solar projects.

How many solar panels will Vietnam have in 2022?

It was officially set to run between 2022 and 2024, with expectations now pointing to the first quarter of this year. There has been no official confirmation from the Vietnamese government thus far. According to Apricum's latest data, the country has installed around 18.47 GW of solar capacity.
