

South Korea s photovoltaic power station power generation BESS

Overview

Is South Korea a Bess supplier?

South Korea is also a major exporter of batteries and energy storage technologies, with Samsung SDI and LG Energy Solution among significant suppliers of products from cells to complete BESS solutions internationally. According to the newest Basic Plan, the country aims to capture a 30% share of the global BESS market by 2036.

What is South Korea's Green Energy Plan?

The initiative is closely tied to South Korea's 11th Basic Plan for Electricity Supply and Demand, which outlines an aggressive ramp-up in renewables. The plan aims to boost the share of green energy from 8.4 percent of the national energy mix in 2023 to 29.2 percent by 2038.

Does South Korea have a battery industry?

But South Korea's battery industry faces mounting pressure from China, whose manufacturers, led by CATL, currently account for nearly 90 percent of global energy storage battery capacity. CATL expanded its footprint in January by establishing a South Korean subsidiary, signaling an aggressive push into the local market.
