

# **Sudan Energy Storage Power Station Electricity Price Adjustment**

## Overview

---

How much does electricity cost in Sudan?

As for Ethiopia, Sudan imports electricity at a price of 4.5 cents/kilowatt . In August 2021, the Minister of Energy and Petroleum declared that the Sudanese energy sector needed urgent maintenance and restructuring at a cost of \$3 billion, another indicator of the dire financial needs of the sector .

What is the electricity tariff in Sudan?

The electricity tariff in Sudan is one of the lowest in the world. With a recent fourfold revision in January 2021, the average tariff has increased to US\$ 0.023/kWh at the market exchange rate, but remains exceptionally low in comparison with tariffs in other Sub-Saharan African countries.

Does Sudan have a problem with electricity supply?

Sudan is currently facing a major problem with electricity supply. According to the report “ Tracking SDG 7: The Energy Progress Report (2021) ”, only 54% of the population in Sudan have access to electricity; this indicates more than 20 million people aren’t connected to the national electricity grid .

Which sector is the largest user of electricity in Sudan?

The residential sector constitutes 60% of the electricity consumption in Sudan and therefore is the largest user segment. Low price provides almost no incentive for households to conserve energy and wasteful use of power is observed. 9. Sudan is facing power crisis as a result of severe demand-supply imbalance.

Does Sudan have a low electricity access rate?

Even though the energy access rate is low; Sudan is making progress in electrification with annual growth over more than 3 percentage points after 2010; more than 70% of Sudan’s population was lacking access to electricity at that time . Table 1 below represents statistical facts about Sudan’s

electricity access rate from (2000 – 2019).

How does the depreciating pound affect electricity production in Sudan?

The depreciating Sudanese pound and continued inflation limits Sudan's ability to recover operational costs for electricity production since the energy sector depends on imported fossil fuels for thermal generation.
