

# **Sudan Phase Change Energy Storage System Quote**

## Overview

---

How many companies are in the electricity sector in Sudan?

The electricity sector is administratively unbundled into five sector companies: Sudan Electricity Holding Company (SEHC), Sudan Thermal Power Generation Company (STPG), Sudan Hydro and Renewable Energy Company (SHREC), Sudan Electricity Transmission Company (SETC) and Sudan Electricity Distribution Company (SEDC).

What is SETAP & how will it impact Sudan?

The proposed SETAP will increase the availability of electricity to grid-connected users, providing off-grid solar solutions for households, productive users and public institutions will pave the path for Sudan's clean energy transition through enhancing readiness of renewable energy projects.

How did the secession of South Sudan affect economic performance?

The secession of South Sudan in 2011 meant that Sudan lost most of its oil reserves and since then has struggled to diversify its economy beyond its dependence on petroleum. UN sanctions, economic mismanagement, a violent conflict, and social unrest over the years had already impacted economic performance adversely.

Does Sudan have a low electricity consumption?

In 2020, the sector recovered less than 20 percent of operational costs. Household electricity consumption in Sudan is among the highest levels in the world. The low price of electricity, combined with the hot climate and inefficiency of appliances, Sudan's level of electricity consumption is very high compared to its regional peers.

What are the transmission and distribution losses in Sudan in 2021?

In 2021, transmission and distribution losses in Sudan were at at 30 percent (25 percent distribution losses and 5 percent transmission losses). The bill

collection rate is 93 percent, attesting to the quality of commercial management and the universal use of prepaid meters.

What is the electricity tariff in Sudan?

The electricity tariff in Sudan is one of the lowest in the world. With a recent fourfold revision in January 2021, the average tariff has increased to US\$ 0.023/kWh at the market exchange rate, but remains exceptionally low in comparison with tariffs in other Sub-Saharan African countries.
