

# **Swedish battery storage box production plant**

## Overview

---

When will a battery energy storage system be built in Sweden?

Construction has begun on Sweden's largest Battery Energy Storage System (BESS) undertaken by Neoen, an Independent Power Producer and Nidec, a system integrator. The project has been projected to come online in early 2025. Neoen is headquartered in Paris.

How important is the battery storage industry in Sweden?

The Battery Storage industry in Sweden presents several key considerations for those researching companies in this field. First, regulatory frameworks are crucial, as Sweden's commitment to sustainability and renewable energy mandates compliance with strict environmental standards.

What is Sweden's largest energy storage investment?

Sweden's largest energy storage investment, totaling 211 MW, goes live, combining 14 sites. 14 large-scale battery storage systems (BESS) have come online in Sweden to deploy 211 MW / 211 MWh into the region.

Is Sweden a leader in the battery industry?

Those who thought it was impossible to catch up with Asia are therefore proven wrong – now Sweden is put on the map as one of the leaders in the battery field. The battery industry is on its way to becoming a new key industry in Sweden, alongside industries such as steel and forestry.

Where are SAFT Batteries made?

Since the 1940s, they have been operating in Sweden specifically through the production facility in Oskarshamn. SAFT is known as a pioneer of high-tech industrial batteries. In Sweden, SAFT produces primary and secondary lithium batteries for the defense, rail, and telecommunications sectors.

Is battery storage a cost-effective and scalable solution?

Axel Holmberg, CEO at Ingrid Capacity, said, “Flexibility solutions, such as large-scale battery storage, have proven to be both a cost-effective and scalable solution.
