

# **Swedish energy storage BESS photovoltaic company**

## Overview

---

When will a battery energy storage system be built in Sweden?

Construction has begun on Sweden's largest Battery Energy Storage System (BESS) undertaken by Neoen, an Independent Power Producer and Nidec, a system integrator. The project has been projected to come online in early 2025. Neoen is headquartered in Paris.

What is Sweden's largest energy storage investment?

Sweden's largest energy storage investment, totaling 211 MW, goes live, combining 14 sites. 14 large-scale battery storage systems (BESS) have come online in Sweden to deploy 211 MW / 211 MWh into the region.

How much power does Sens' Bess project have?

SENS has secured the land for the early-stage project near Katrineholm, Sörmland. The developer said the target is for the BESS plant to achieve a capacity of 50MW and 15MW for the solar array. The two parts of the project do not appear to share a grid connection, with SENS saying the project totals 65MW of power.

Where is the 10MW Bess project located?

The 10MW BESS will be strategically located in SE3, helping to stabilize the grid by providing ancillary and balancing services across frequency markets. "We are excited to deliver this project to our customer," said Magnus Häggström, Chief Commercial Officer at Helios Nordic Energy.

What makes a Bess system profitable?

To maximize profitability, BESS systems must operate across multiple markets, balancing peak shaving, arbitrage, and other revenue streams. Developers are increasingly focusing on intelligent automation to fine-tune battery operations. Cybersecurity in energy infrastructure is becoming a critical issue.

## Swedish energy storage BESS photovoltaic company
