

Syria Solar power or AC power

Overview

In the 2000s, Syria's struggled to meet the growing demands presented by an increasingly energy-hungry society. Demand grew by roughly 7.5% per year during this decade, fueled by the expansion of Syria's and sectors, the spread of energy-intensive, and state policies (i.e. high and low) that encouraged wasteful energy practices. Syria's inefficient infrastructure compounded these probl.

With the recent lifting of sanctions, Syria is looking to solar power as a solution to its ongoing energy crisis. For years, the country has struggled with intermittent electricity supply, primarily due to the devastating effects of a prolonged civil war and crippling international sanctions.
