

The largest offshore solar photovoltaic panel site

Overview

The one-gigawatt facility, situated eight kilometres off the eastern coast of Dongying City, represents the largest open-sea solar installation globally and establishes a new template for marine-based renewable energy projects.

The largest offshore solar photovoltaic panel site

Overview of the floating offshore photovoltaic energy potential

One of the world's largest floating solar PV farms, with around 60 MWp (122,000 solar panels), was installed in 2021 in the Tengeh Reservoir (Singapore) (Figure 10).
