

# **Three Gorges Photovoltaic Power Station Power Generation**

## Overview

---

Including the 250MW floating photovoltaic project (already put into operation) at the southern wind and solar energy storage base (ancient city) in Fuyang City, which was previously co-built by SHAREPOWER, with a total installed capacity of 650MW, it is currently the largest floating photovoltaic power station in China and even the world, with an average annual power generation of about 700 million kilowatt hours.

## Three Gorges Photovoltaic Power Station Power Generation

---

### [VALIDATION REPORT TITLE FOR THREE GORGES NEW ...](#)

The proposed VCS project activity consistent of a newly built grid-connected photovoltaic power plant with installed capacity of 100MWp which is located in Solar Power Industry Zone, ...
