

Tunisia mobile power station electricity price

Overview

The reports for 2014 an electricity production of 19 TWh, compared to 10.5 TWh in the year 2000. The (STEG), a public company, ensures the three quarters of production. The network operates at 50 Hertz and the voltage at the domestic level is 230 Volts. Virtually all Tunisian electricity (18 TWh) is produced by burning natural gas.

How much electricity does Tunisia have?

The network operates at 50 Hertz and the voltage at the domestic level is 230 Volts. Virtually all Tunisian electricity (18 TWh) is produced by thermal power plants burning natural gas, the largest of which is in Sousse. Wind energy is the second largest source of electricity in the country; a capacity of 305 MW has been installed in a few years.

What is Tunisia's energy policy?

Tunisia aims to cover 35% of its power mix with renewables in 2030. CO₂ emissions decreased by 1.7% in 2022. STEG has the monopoly on power generation, transmission, and distribution, and manages gas transmission and distribution. ETAP is the largest oil and gas company. The country relies increasingly on gas imports from Algeria (62% in 2022).

What is the energy sector in Tunisia?

The energy sector in Tunisia includes all production, processing and, transit of energy consumption in this country. The production involves the upstream sector that includes general oil and gas, the downstream sector that includes the only refinery in Tunisia and most of the production of natural gas, and varied electrical/renewable energies.

How does Tunisia regulate the public energy companies?

It regulates the public energy companies through two directorates: the General Electricity Directorate and the General Hydrocarbons Directorate. Tunisia's gas production, which covered 61% of domestic consumption in 2010, has been declining since then and only covered 38% of consumption in 2022.

Will the got build a power plant in Tunisia in 2024?

In 2024, the GOT is also expected to launch a tender for the construction of at least one 470-550 MW combined-cycle power plant in Skhira (south Tunisia) as an IPP. In May 2018, the Ministry of Energy and Mines published a call for private projects to build renewable power plants with a total capacity of 1,000 MW (500 MW wind and 500 MW solar).

How much electricity is needed in Tunisia in 2027?

The Tunisian power market installed 6312.84 MW of capacity in 2020, and it is expected to reach 11316.94 MW by 2027, registering a CAGR of 7.7% during the forecast period of 2022-2027. Due to the COVID-19 pandemic, the electricity demand in Tunisia registered a significant reduction.
