

UK integrated energy storage battery

Overview

What is a battery energy storage system?

Battery energy storage systems (BESS) play an important role in successfully implementing integrated renewables, providing grid stability, and ensuring energy efficiency during the energy transition currently being witnessed in the UK.

What is the biggest battery storage project in the UK?

The 1,400MW (3,100MWh) project will be the largest battery storage project in the UK, and one of the largest in Europe. The project was approved by Doncaster Council on 28 January 2025 and will help strengthen the local economy by creating jobs during the construction and operation of the facility.

Where are Scotland's largest battery energy storage systems located?

Scotland is hosting three of Europe's largest battery energy storage systems: Projects: Coalburn 2 in South Lanarkshire, Devilla in Fife and Coalburn 1 are already under construction. Capacity: Co-located total power capacity of 1.5GW and 3 GWh of energy storage capacity. Timeline: Effective by 2027-28.

Why is battery storage so important in the UK?

The capability of these technologies to support renewables, support grid stability, and help deliver flexible energy storage is especially pertinent. By early 2025, there will be phenomenal growth in battery storage capacity taking place in the UK: Operational capacity: Around 5 GW of battery storage capacity is operational.

How much battery storage capacity does the UK have?

The UK's total battery storage project pipeline currently contains a total of 127GW of capacity. Figure 1 demonstrates the amount of capacity at each development stage as a proportion of the total pipeline. 8% of the capacity

pipeline in the UK is operational or under construction, with 31% approved and yet to begin construction.

What is a battery energy storage system (BESS)?

By definition, a Battery Energy Storage Systems (BESS) is a type of energy storage solution, a collection of large batteries within a container, that can store and discharge electrical energy upon request.
