

US Power Supply Solar System Quote

Overview

What is solar power supply?

Solar Power Supply is not just about solar energy. We are about Change; in the way we live, the way we work, the way we play, and the way we improve the environment. We help create that change in both your home and your business.

Why should you choose US solar supplier?

From essential components like solar modules and inverters, to energy storage solutions, racking systems, and all the necessary accessories for a reliable solar power supply, US Solar Supplier simplifies the process.

Do you recommend us solar supplier?

We surely recommend them for any of your solar equipment needs! If you are thinking about solar, this is the company to talk to. They were honest, professional, and answered all my questions. They helped us choose the right panels and batteries for our solar system. I can't recommend them enough. Why US Solar Supplier?

.

How much do solar panels cost?

Compare the prices of the 3 best rated solar companies in your zip code. (Claim the 30% solar tax credit NOW!!) How much do solar panels cost for a home?

The average cost of residential solar panels in the US in 2024 is now only \$2.90 per watt. This makes a 7 kW system only \$14,210 after claiming the federal tax credit.

How much does a 5000 watt solar system cost?

A fully installed solar system typically costs \$3 to \$5 per watt before factoring in incentives like the 30% tax credit. Using this measurement, 5,000 Watt solar system (5 kW) would have a gross cost between \$15,00 and \$25,000. The price per watt for larger and relatively straightforward projects are often within the \$3-\$4 range.
