

Ukrainian container emergency power generation equipment

Overview

How important is Ukraine's energy sector?

Speaking at the handover ceremony, Minister Kamikawa emphasized the importance of supporting Ukraine's energy sector, stating, "This support to restore the destroyed energy infrastructures will contribute to the uninterrupted supply of electricity and heating for people in Ukraine to survive the cold winter."

Does Ukraine have a green energy sector?

According to the UNDP in Ukraine report "Towards a Green Transition of the Energy Sector in Ukraine," power generation capacity in Ukraine has been reduced to nearly 50 percent of its pre-2022 levels. Out of nearly 37 GW of installed capacity, over 19 GW has been destroyed, damaged or occupied since February 2022.

How many Ukrainians are without electricity?

Russian attacks on civilian infrastructure temporarily left around 10 million Ukrainians without electricity, while temperatures have already dropped below zero. The campaign will facilitate city-to-city donations of power generators, transformers and other devices, sent with the logistical support of the EU Civil Protection Mechanism.
