

Vietnam solar panels are environmentally friendly

Overview

Globally, solar generation continues to go from strength to strength. In 2021, after an additional 143 TWh of solar capacity added to the world's energy mix.

Viet Nam's ascendancy into the top ten global solar generators must be placed in the wider regional context of Asia. A rapid transition towards renewable energy is.

Environmentally, solar power significantly reduces Vietnam's carbon emissions, directly addressing air pollution and climate change challenges. Currently, air pollution contributes to 60,000 annual deaths in the country.
