

# **What is the specification of outdoor power supply in Brunei**

## Overview

---

Does Brunei have a power supply?

Brunei, a small country on the island of Borneo, has developed its electricity supply network in recent years. While power outages and voltage fluctuations can still occur, they are not as common as they used to be. As of 2021, Brunei has a total installed capacity of 1,054 MW, with an estimated peak demand of around 580 MW.

How reliable is the electricity system in Brunei?

Overall, the electricity supply network in Brunei is relatively reliable, with the country's power system having a good track record of providing uninterrupted power to its customers. The government has invested in upgrading and modernizing the electricity supply infrastructure in recent years, contributing to the network's reliability.

Which electrical appliances should I buy in Brunei Darussalam?

7.1.1 Purchase only electrical appliances that are suitable and safe for use in Brunei Darussalam, which satisfy the legal criteria for safety. 3-phase, 4-wire AC (L1, L2, L3, N) or 230V single-phase, 2-wire AC (L, N).

What type of energy is used in Brunei?

The generation mix in Brunei is dominated by natural gas, which accounts for around 95% of the country's total installed capacity. The remaining capacity is generated from oil-fired power plants. Renewable energy sources, such as solar and wind, are not yet widely utilized in Brunei, although some small-scale projects are underway.

Who manages the electricity supply network in Brunei?

The electricity supply network in Brunei is operated and managed by the state-owned utility company, the Brunei National Energy Company (BNEC), which was established in 2016. BNEC is responsible for generating, transmitting, and

distributing electricity in the country.

Are power outages common in Brunei?

While power outages and voltage fluctuations can still occur, they are not as common as they used to be. As of 2021, Brunei has a total installed capacity of 1,054 MW, with an estimated peak demand of around 580 MW. The country has a relatively small population of approximately 460,000 people, with most residing in urban areas.
