

# **When will the 5G Chinese base station be built in Uganda**

## Overview

---

Will China build a 5G base station next year?

Technicians from China Mobile check a 5G base station in Tongling, Anhui province. [Photo by Guo Shining/For China Daily] China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

How many 5G stations are there in China?

Stock photo of a network tower. Base stations offering high-speed fifth-generation (5G) mobile networks have now exceeded 3.19 million, the Ministry of Industry and Information Technology (MIIT) in China has said. The country now hosts 22.6 5G stations for every 10,000 residents, CGTN reported.

How many 5G base stations are there in India?

Citing that the country has built a staggering 4.19 million 5G base stations, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.

What is China's ambitious 5G project?

China's ambitious project is not just aimed at delivering different types of content to users but also taking its production capacities to the next level. The country has been working to incorporate 5G technology into mining, power supply, and other industrial sectors in a bid to improve efficiency and reduce costs.

What will China do with the 5G push?

Alongside the 5G push, China will also start trials for 10-gigabit optical networks and optimize computing power centers amid an artificial intelligence (AI) boom brought on by ChatGPT.

## Will 5G improve public services?

Official numbers for the US suggest that the US built 100,000 base stations between the years 2019 and 2021 and while Americans are looking at 5G to stream videos better and play games on their increasingly powerful smartphones, China is looking to deploy the technology for improved delivery of public services.
