

# **Which battery cabinets are more common in Italy's photovoltaic communications industry**

## Overview

---

How many GW of battery energy storage systems are there in Italy?

Analyst Aurora Energy Research tells pv magazine Italia 3 GW of battery energy storage systems (BESS) are at an advanced stage in Italy and expected online within three years.

Why is energy storage important in Italy?

As electricity prices continue to rise and Italy accelerates its shift toward renewable energy, reliable and efficient energy storage has become essential for both homeowners and businesses.

Which country has a strong battery industry after Italy?

“After Italy, the UK follows, supported by a strong installed capacity of 4.3 GW, an established battery industry which is estimated to more than double to 10.6 GW, and attractive revenue streams that strengthen its position,” the consultancy has stated.

How many GW of batteries will be added in Italy by 2030?

“We expect 10.5 GW [of battery projects] to be added in Italy by 2030, of which 3 GW are already in an advanced stage so they will probably come online within the next two to three years,” said Eva Zimmermann, senior associate for flexible energy at Aurora.

How important are Bess in Italy's energy transition?

MP: BESS are becoming increasingly vital in Italy’s energy transition. With the ambitious targets outlined in the National Energy and Climate Plan (NECP), including reducing carbon emissions and increasing renewable energy to 30% of final energy consumption by 2030, BESS are essential.

Which European country has the most battery market?

Italy is the most interesting European battery market, followed by Great Britain and Germany, according to a report released earlier this week by UK-based analyst Aurora Energy Research which examined 28 European countries.
