

# **Wholesale price of energy storage vehicles in India**

## Overview

---

Which companies are deploying energy storage systems in India?

Renew Power, one of India's largest renewable energy companies, has recently forayed into energy storage solutions. The company is deploying utility-scale battery storage systems to enhance grid stability and integrate renewable energy into the grid more effectively. 7. Okaya Power Group.

How much does battery-based energy storage cost in India?

Currently, the cost of battery-based energy storage in India is INR 10.18/kWh, as discovered in a SECI auction for 500 MW/1000 MWh BESS. The government has launched viability gap funding and Production-Linked Incentive (PLI) schemes to make battery storage affordable.

What is energy storage as a service?

Additionally, emerging business models such as Energy Storage as a Service (ESaaS) offer storage as a service rather than an owned asset, lowering the entry barrier for users through subscription-based or pay-per-use arrangements.

How do I Choose an energy storage system?

When selecting an energy storage solution, consider factors such as energy requirements, scalability, and technology type. Lithium-ion batteries, for instance, are ideal for residential and EV applications, while grid-scale storage systems are suited for large-scale renewable projects.
