

# Why can't I use the smart battery replacement cabinet

## Overview

---

What happens if a smart lock battery dies?

A dead smart lock battery could compromise your home's security. Without the smart lock operational, you may need to rely solely on physical keys, potentially increasing the risk of unauthorized entry if you lose your key. Some smart locks may not provide sufficient low battery warnings, leaving you unaware of the impending battery failure.

Do smart locks need batteries?

Yes, smart locks require batteries since they are battery-powered. It is also one of the advantages of smart locks since it doesn't rely on electricity, so even if there's a power outage, your smart lock will still function properly. What is the best type of battery for smart locks?

.

How do you replace a battery in a smart lock?

Most smart locks have a battery compartment on the inside of the door. You may need to remove a cover or panel to access the batteries. Remove the old battery and replace it with a new one. Be sure to match the polarity (+ and -) according to the markings inside the compartment.

What if my smart lock battery is low?

Be aware of altered security settings or temporary codes that smart locks may have in place when the battery is low or dies. Regularly check battery status and respond promptly to low battery alerts to avoid potential lockouts. Replacing smart lock batteries following manufacturer's instructions is crucial to prevent unexpected lockouts.

Do smart door locks rely on batteries?

Yes, smart door locks rely on batteries to operate. These batteries power

essential components of the lock, such as the keypad, motor, and smart features (e.g., Bluetooth or Wi-Fi connectivity).

How to prevent a dead smart lock battery?

Wipe them gently with a clean cloth or cotton swab if necessary. This will help maintain good conductivity and optimize the battery life. By implementing these preventive measures, you can significantly reduce the risk of a dead smart lock battery.
