

Zero down payment solar sun room

Overview

What is zero down solar?

Zero down solar is simply financing your solar installation so that you (the homeowner) can avoid paying any cash upfront. With an average-sized 5kW solar installation costing around \$15k, avoiding that huge payment seems like a great idea, right?

But how exactly do you go solar with no upfront payments, and how does it work?

.

Do solar loans come with a zero-down option?

Most solar loans come with a zero-down option. The amount you pay monthly depends on how much your system costs to install, your interest rate, your loan term, and the type of loan you choose, but your monthly loan payments will still cost less than your previous electricity bill, providing you with immediate savings.

Should you buy a solar system with no down payment?

Although the idea of having no down payment is appealing – especially for big-ticket purchases like cars or solar panels – it's important to understand the overall financial commitment you're making before spending tens of thousands of dollars on a solar system that you'll rely on for more than two decades.

What is a zero-down solar PPA?

With a zero-down solar PPA, you owe nothing to your provider upfront. Like solar leases, your monthly bill will likely be between 10% and 30% lower than your previous electric bill, and you'll likely have an annual rate increase of one to three percent per year (depending on your agreement), which also means you save less than with a solar loan.

What is a zero-down power purchase agreement (PPA)?

Zero-down power purchase agreements, or PPAs, work similarly to solar leases. You agree on a set price for your electricity with your provider and use the electricity generated by your solar energy system.

Which zero-down option has the most financial upside?

The zero-down option with the most financial upside is a solar loan. When you take out a solar loan, you borrow money from a lender at a fixed-interest rate and pay it back in monthly installments. Your monthly payments will always be consistent and never increase.

Zero down payment solar sun room

[Meraki Solar , Power Your Home with Solar Energy](#)

Zero-down solar means you pay nothing until after your solar panel system is installed. After installation, you pay your panels off monthly at a flat rate, just like a utility bill.
